

NEW!

PAN-STEEL™ Extra Heavy and Super Heavy Stainless Steel Ball-Locking Ties

-reduce installation times for a higher ROI

The new range of labour-saving PANDUIT™ Stainless Steel Ball-Locking Ties are set to revolutionise the way in which cable management in hazardous environments is performed.

The new ties have a width of 12.7mm (Extra-Heavy Cross Section) and 15.9mm (Super-Heavy Cross Section), they are self-locking for quick installation and offer the highest loop tensile strengths; at up to one sixth of the installation time of strapping.

The ties exhibit all the additional features of PANDUIT PAN-STEEL™ Stainless Steel Cable Ties making them one of the most cost effective and safest cable management solutions.

¹For loop tensile strength figures, please refer to www.panduit.com

EH & SH Stainless Steel Ties

- Reduce installation time up to 6-fold, when compared to conventional strapping
- Highest rated loop tensile strength featuring slip-back technology
- Patented innovative displacement lock
- Wider load-bearing surface for increased safety
- Stainless steel construction for superior performance
- Single and double loop designs
- Self-locking design for quick and easy installation
- Full range of tooling.

Technical

Material	304 or 316 grade Stainless Steel/Non-Magnetic
Flammability	Non-Flammable
Temperature	-80°C to 538°C

Features and Benefits

Rounded Edges	Prevents damage to insulation on cables as well as protecting installers and maintenance workers from injury
High Strength	Increased performance and reliability over the life of the installation
Self-Locking	Lower installed cost

Double Loop Stainless Steel Ties

PANDUIT Extra Heavy and Super Heavy Stainless Steel Self-Locking Ties

Part Numbers*	Max Bundle Dia. (mm)	Length (mm)	Width (mm)	Thickness (mm)	Installation Tool	Std. Pkg. Qty
MLT4EH-LP	102	434	12.7	0.25	RT1HT, ST3MT	50
