

# Thermal Reflective Products

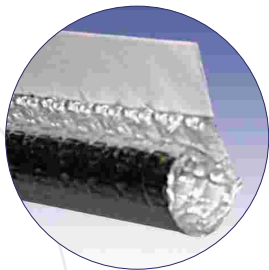

## Therm-L-Lite® FG

- Radiant heat protection up to 175°C
- Fray resistant
- Fluid and chemical resistant
- Non-asbestos
- Conforms to complex component designs
- Tubular construction - no sew line

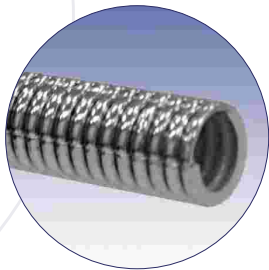

## Therm-L-Lite® U

- Radiant heat protection up to 175°C
- Fray resistant
- Extremely flexible
- Fluid and chemical resistant
- Non-asbestos
- Conforms to complex component designs

## Therm-L-Wrap™

- Convective heat protection up to 200°C
- Self-Wrapping Design
- Flexible
- Fluid and Chemical Resistant

## ConvoShield® AL

- Radiant heat protection up to 170°C
- Reflects radiant heat away from protected component
- Reduces component temperature
- Enhances harness rigidity
- Fluid resistant
